

VETERINARY™ HPM

Gower Vets is now recommending and stocking a brand new range of dog and cat foods called **Veterinary HPM**.

Veterinary HPM is a new generation of dog and cat food, specifically developed to provide the closest match to the nutritional needs of your pet carnivore.

The product of expert formulation, Veterinary HPM is based on a unique **low-carb, high-protein** formula. That means that it's lower in starch and carbohydrate and higher in animal protein. The result is a dog and cat food that's perfectly adapted to your pet's nutritional needs – and they'll love the taste too!

In addition to its low-carb, high-protein formulation, each product in the Veterinary HPM range also contains carefully selected dietary supplements to provide expertly tailored nutrition for the specific health challenges at each stage of your pet's life, helping to keep them in optimal health.

Veterinary HPM also uses a **low-allergen formulation**, meaning that is free from common food allergens such as maize, wheat, soya and gluten to name just a few.

Despite being one of the most advanced pet foods on the market, Veterinary HPM usually works out more cost effective than other leading brands, and also offers a loyalty scheme (once you have purchased 5 bags you will receive your 6th bag free!).

We're so confident that your pet will love Veterinary HPM that we will offer a full money-back guarantee! If they won't eat it, we'll provide a full refund or replacement.

If you would like to find out more about Veterinary HPM, please don't hesitate to call or pop-in and speak to any member of your veterinary team.
